Professor/Instructor: FRITZ SAMSON-REMIGIO
Academic Term and School Year: 2025-2026

Samar College Vision, Mission, Core Values and Mantra

SC Vision

We are the leading center of learning in the Island of Samar. We take pride in being the school of first choice by students where they can fully attain academic and personal achievements through affordable education, excellent instruction, and state-of-the-art facilities in a values-driven education.

SC Mission

Samar College is a community-based, privately owned learning institution that provides quality basic, tertiary and graduate education to students of Samar Island and the neighboring communities. We commit to help our students improve their quality of life by delivering affordable, values-driven, industry-relevant curricular programs that produce globally-competitive, innovative, service-oriented and God-fearing citizens who contribute to the progress of the society.

Core Values

Samar College commits itself to the following values represented by the acronym **INSPIRE**, as follows: **I** – Integrity – **N** – Nation-Building, **S** – Spirituality, **P** – Professionalism, **I** – Inclusivity, **R** – Resourcefulness, **E** – Excellence.

1. We ensure that our educational system is at the forefront of innovation and technology providing our faculty and students all opportunities to develop to their fullest potential.
2. We provide solid foundation in education and values that serve as the springboard to gainful employment and entrepreneurship for better quality of life for our people.
3. We value people as our greatest resource ensuring that their dignity and well-being are respected at all times.
4. We create leaders who are willing to put the greater good of others above their personal interest. We uphold our principles and values even when others choose not to do so.
5. We foster excellence in the arts to refine the expression of thoughts and feelings.
6. We strive to lead and not be led, to influence rather than be influenced. By our examples, we shall be judged.
7. We treat one another with respect and genuine concern. We go beyond the call of duty to make sure that no one is left behind.

SC MANTRA - FOCUS and RISE IN SAMAR COLLEGE

The mantra FOCUS and RISE in Samar Colleges Inc is designed to emphasize commitment, accountability, and the drive to excel. It underscores focus and rising to ensure that Samar Colleges will attain its preferred future: **"Samar College as Champion for Empowering Leaders and Changemakers"**

FOCUS and RISE framework represents the 10 working principles to be adopted and integrated in the operation of the College that will surely position it to a level that will be highly competitive as an educational institution not only in the region but in the country. By 2030, Samar Colleges Inc. shall start to earn recognitions for its cutting edge projects and innovations implemented to empower its human resources, students and alumni. Samar College shall focus on holistic development and social responsibility. Thus,

F – Follow through to completion

O – Organize tasks by breaking down big ideas into doable parts

C – Connect new ideas with old ones (Associate new ideas with the old)

U – Uphold doing things right from the start (Do the right things right the first time)

S – Substantial focus on the vital few, not the trivial many
and

R – Results-driven (Begin with the end in mind)

I – Integrity in doing the right things, not the easier wrong

S – Self-accountability (If it is to be, it is up to me)

E – Exceed expectations by facing challenges with determination (No challenge too great, no task too menial)

Principles Mapped to the Acronym:

1. **Begin with the end in mind** → Results-driven (**R**)
2. **Associate new ideas with the old** → Connect new ideas with old ones (**C**)
Do not reinvent the wheel → Connect new ideas with old ones (**C**)
3. **Break down big ideas into doable parts** → Organize tasks (**O**)
4. **Follow through to completion** → Follow through (**F**)
5. **Do the right things right the first time** → Uphold doing things right (**U**)
6. **Focus on the substantial few and not the trivial many** → Substantial focus (**S**)
7. **Do the right things and not the easier wrong** → Integrity in decisions (**I**)
8. **No challenge too great, no task too menial** → Exceed expectations (**E**)
9. **If it is to be, it is up to me** → Self-accountability (**S**)
10. **Temper your decision in moderation** → Rise with Resilience (**R**), incorporating the essence of moderation and balance thriving within limits, where decisions are tempered to adapt effectively.

II. COLLEGE OF INFORMATION TECHNOLOGY AND ALLIED SCIENCES GOALS:

The Department of Information Technology and Allied Sciences is committed to delivering values-driven and industry-relevant academic programs in Information Technology and Multimedia Arts.

III. Program Objectives

1. **Demonstrate Professional and Technical Competence** → Graduates shall possess a strong foundation in computing, science, and mathematics, enabling them to design, develop, and manage IT solutions that meet industry standards and respond to user needs in local and global contexts.
2. **Utilize Modern Tools and Emerging Technologies** → Graduates shall apply current techniques, skills, and tools necessary for IT practice and adapt to the changing technological landscape to remain competitive and innovative.

IV. Course Description

IT – 305 Integrative Programming and Technologies II the course is also a hands-on, project-based experience in advanced programming structures that involve the re-enforcement of multiple technologies, this time to realize enterprise applications. On top of the above 5 skills, students will also learn how to put different things (programming languages, APIs, databases and frameworks) together resulting in functional solutions that are robust and can scale. By focusing on software architecture, cross-platform development, version control and deployment strategies the course provides students with the tools they need to be successful in real-world IT projects.

V. PROGRAM OUTCOMES

Program Outcomes		Dominant Attributes
IT01	Apply knowledge of computing, science, and mathematics appropriate to the discipline	Knowledge for Solving Computing Problems
IT02	Understand best practices and standards and their applications	
IT03	Analyze complex problems, and identify and define the computing requirements appropriate to its solution	Problem Analysis
IT04	Identify and analyze user needs and take them into account in the selection, creation, evaluation, and administration of computer-based systems.	
IT05	Design, implement, and evaluate computer-based systems, processes, components, or programs to meet desired needs and requirements under various constraints	Design/Development of Solutions/Innovation
IT06	Integrate IT-based solutions into the user environment effectively	
IT07	Apply knowledge through the use of current techniques, skills, tools, and practices necessary for the IT profession	Modern Tool Usage
IT08	Function effectively as a member or leader of a development team recognizing the different roles within a team to accomplish a common goal	Individual and Team Work
IT09	Assist in the creation of an effective IT project plan	
IT10	Communicate effectively with the computing community and with society at large about complex computing activities through logical writing, presentations, and clear instructions	Communication
IT11	Analyze the local and global impact of computing information technology on individuals, organizations, and society	Computing Professionalism and Social Responsibility
IT12	Understand professional, ethical, legal, security, and social issues and responsibilities in the utilization of information technology	
IT13	Recognize the need for and engage in planning self-learning and improving performance as a foundation for continuing professional development (Common to SC Graduates)	Life-long Learning

VI. COURSE LEARNING OUTCOMES AND CURRICULUM MAP

CLO CODE	COURSE LEARNING OUTCOME	Program Outcomes												
		IT 01	IT 02	IT 03	IT 04	IT 05	IT 06	IT 07	IT 08	IT 09	IT 10	IT 11	IT 12	IT 13
CLO1	Develop integrated applications combining multiple programming languages and frameworks.	I	I	P	P	D	D	D	P	P	P	D	D	P
CLO2	Implement API integrations for data exchange between heterogeneous systems.	I	I	D	P	D	D	D	P	P	P	D	D	P
CLO3	Apply advanced database operations in integrated systems using SQL and NoSQL.	I	I	D	D	D	P	D	P	P	P	D	D	P
CLO4	Utilize version control systems for collaborative software development.	I	I	P	P	P	D	D	D	D	P	D	D	P
CLO5	Apply security, privacy, and ethical principles in integrated software solutions.	D	D	D	D	D	D	D	P	P	P	D	D	P
CLO6	Deploy integrated systems in local or cloud-based environments.	I	I	P	P	D	D	D	P	P	P	D	D	P
CLO7	Document, present, and defend integrated software projects.	D	D	P	P	P	P	P	D	D	D	D	D	P

I – Introduced

P – Practiced with Supervision

D – Demonstrated across different settings with minimal supervision

VII. COURSE CONTENT

Intended Learning Outcomes	Topic / Activity	Week No. / Number of Hours	CLO Alignment
1. Understand course goals, install and configure tools, initialize Git repository	Course Orientation; Environment Setup; Git Basics	1 / 5 hrs	CLO4
2. Apply reusable software design principles in program development	Review of OOP Concepts & Design Patterns	2 / 5 hrs	CLO1
3. Implement inter-language communication between different programming environments	Multi-Language Integration Basics (Java + Python, PHP + JS)	3 / 5 hrs	CLO1
4. Consume and produce APIs for system integration	API Fundamentals (REST, SOAP)	4 / 5 hrs	CLO2
5. Secure API endpoints with authentication and encryption techniques	API Security & Authentication (OAuth, JWT)	5 / 5 hrs	CLO2, CLO5
6. Combine relational and non-relational databases in a single system	Database Integration (SQL + NoSQL)	6 / 5 hrs	CLO3
7. Apply ORM frameworks to abstract database operations	ORM Frameworks (Hibernate, Sequelize)	7 / 5 hrs	CLO3
8. Present integration plan for final project with architecture diagram	Midterm Project Proposal Presentation	8 / 5 hrs	CLO1–CLO6
9. Implement asynchronous processing and event-driven workflows	Asynchronous Programming & Event-Driven Architecture	9 / 5 hrs	CLO1
10. Integrate cloud-based APIs and services into applications	Cloud Services Integration (AWS, Azure, Firebase)	10 / 5 hrs	CLO6
11. Deploy applications as microservices using containerization	Microservices & Containerization (Docker)	11 / 5 hrs	CLO6

Intended Learning Outcomes	Topic / Activity	Week No. / Number of Hours	CLO Alignment
12. Apply secure coding practices and run vulnerability assessments	Security Hardening & Vulnerability Testing	12 / 5 hrs	CLO5
13. Begin building core modules of integrated system	Project Development – Phase 1 (Core Modules)	13 / 5 hrs	CLO1–CLO6
14. Integrate modules and begin feature testing	Project Development – Phase 2 (Integration)	14 / 5 hrs	CLO1–CLO6
15. Finalize all system components and perform full testing	Project Development – Phase 3 (Finalization)	15 / 5 hrs	CLO1–CLO6
16. Deploy system to staging or production environment	System Deployment & Testing	16 / 5 hrs	CLO6
17. Complete documentation and rehearse presentation	Documentation & Presentation Preparation	17 / 5 hrs	CLO7
18. Present and justify final integrated system	Final Project Defense	18 / 5 hrs	CLO6, CLO7

VIII. LEARNING PLAN

Week	Topic / Activity	Intended Learning Outcomes	Learning Activities	Assessment Method	CLO
1	Course Orientation; Environment Setup; Git Basics	Understand course goals, install tools, configure Git	Guided setup, demo, Q&A	Setup checklist, participation	CLO4
2	Review of OOP Concepts & Design Patterns	Apply reusable software design principles	Lecture, coding exercises	Graded exercises	CLO1

Week	Topic / Activity	Intended Learning Outcomes	Learning Activities	Assessment Method	CLO
3	Multi-Language Integration Basics (e.g., Java + Python, PHP + JS)	Implement inter-language communication	Lab exercises on language interoperability	Lab output	CLO1
4	API Fundamentals (REST, SOAP)	Consume and produce APIs	API creation and testing workshop	API implementation output	CLO2
5	API Security and Authentication (OAuth, JWT)	Secure API endpoints	Implement authentication in sample API	Security implementation checklist	CLO2, CLO5
6	Database Integration (SQL + NoSQL)	Combine relational and non-relational data sources	Database connection and queries lab	Graded lab output	CLO3
7	ORM Frameworks (Hibernate, Sequelize)	Apply ORM for database abstraction	ORM configuration and CRUD operations	ORM lab output	CLO3
8	Midterm Project Proposal Presentation	Present integration plan for final project	Group project planning, architecture design	Proposal presentation, Gantt chart	CLO1–CLO6
9	Asynchronous Programming & Event-Driven Architecture	Implement asynchronous tasks	Coding exercises using async features	Graded async program output	CLO1
10	Cloud Services Integration (AWS, Azure, Firebase)	Use cloud-based APIs and storage	Hands-on cloud API connection	Cloud integration output	CLO6
11	Microservices and Containerization (Docker)	Deploy services in isolated environments	Docker container creation and deployment	Dockerfile and container output	CLO6
12	Security Hardening & Vulnerability Testing	Apply secure coding practices	Code scanning and security fixes	Security test report	CLO5
13	Project Development – Phase 1	Build core modules of integrated system	Group development sessions	Progress report	CLO1–CLO6

Week	Topic / Activity	Intended Learning Outcomes	Learning Activities	Assessment Method	CLO
14	Project Development – Phase 2	Continue building, integrate modules	Group development sessions	Progress check	CLO1–CLO6
15	Project Development – Phase 3	Finalize modules, implement final testing	System integration and debugging	Testing report	CLO1–CLO6
16	System Deployment & Testing	Deploy to staging or production environment	Deployment lab, test cases	Deployment checklist	CLO6
17	Documentation & Presentation Preparation	Compile system documentation and presentation	Writing, formatting, mock presentations	Draft documentation	CLO7
18	Final Project Defense	Present and justify project outcomes	Formal presentation and Q&A	Rubric-based grading	CLO6, CLO7

IX. GRADING SYSTEM/BREAKDOWN

Grade computation = (((score / numberOfItems) x 40) + 60));

Assessment Component	Percentage	Description
Prelims weekly Lab Activities and Exercises	25%	Individual practical tasks integrating multiple technologies
Pre-finals project Proposal	15%	Group proposal with architecture diagram, integration plan, and tech stack
Finals project (System + Defense)	35%	Fully functional integrated system evaluated during defense
<i>Attendance and Participation</i>	<i>10%</i>	<i>Punctuality, collaboration, and engagement</i>
<i>Final Documentation</i>	<i>15%</i>	<i>Complete system documentation with diagrams, testing logs, and reflection</i>

XI. HOUSE RULES AND CLASSROOM POLICIES

1. Be on time and attend regularly. Three lates = 1 absences.
2. No food or drinks in the lab. Use computers only for class tasks.
3. No cheating or copying. Submit your own work.
4. Follow deadlines. Late work may get lower grades.
5. Work well in groups. Share tasks fairly.
6. Be respectful. No loud noise or phone use during class.
7. Follow school rules. Misbehavior may lead to disciplinary action.

XII. CONSULTATION HOURS

1. By appointment

COURSE OFFERING

To respond more meaningfully to its educational objectives and its commitment to the continuous pursuit of excellence in different fields of education, Samar College offers the following programs:

Degree Programs:

- **College of Graduate Studies (CGS)**
 - **Master of Arts in Education (MAED) with Specialization in:**
 - Educational Management
 - Elementary Education
 - Filipino Communicative Language Learning
 - Reading
- **College of Education (CoEd)**
 - **Bachelor of Secondary Education (BSED) with Specialization in:**
 - English
 - Filipino
 - Social Studies
 - Mathematics
 - Science
 - **Bachelor of Elementary Education (BEED) with specialization in:**
 - Generalist Curriculum
- **College of Information Technology and Allied Sciences (CITAS)**
 - **Bachelor of Science in Information Technology (BSIT)**
 - **Bachelor of Multimedia Arts (BMMA)**
- **College of Business & Management (CBM)**
 - **Bachelor of Science in Business Administration (BSBA) Major in:**
 - Financial Management
 - Marketing Management
- **College of Criminal Justice Education (CoCJE)**
 - **Bachelor of Science in Criminology (BSCRIM)**
- **College of Liberal Arts and Sciences (CLAS)**
 - **Bachelor of Arts in Social Science**
 - **Bachelor of Arts in Sociology (BA Sociology)**
 - **Bachelor of Arts (AB)**

- **Samar College Technological Institute (SCTI) Training Offerings:**
 - **Cookery NC II**
 - **Computer System Servicing NC II**
 - **3-Years Diploma in Information Technology (DIT)**

Basic Education:

- **Senior High School**
 - Humanities and Social Sciences (HUMSS)
 - Accounting and Business Management (ABM)
 - Information Communication Technology (ICT)
 - Home Economics (HE)
- **Junior High School**
- **Elementary**
- **Pre-school**

DEANS UPDATE

The College of Arts and Sciences(CAS) Department has been removed.
College of Liberal Arts and Sciences (CLAS) and College of Information Technology and Allied Sciences (CITAS)

Jacqueline Montalis – College of Education
Mary Ann Abaigar – College of Criminal Justice Education
Robert B. Flora – College of Information Technology & Allied Sciences
Nimfa T. Torremoro – College of Graduate Studies
Natalia B. Uy - College of Business & Management
Mr. Jerick C. Cuevas - Office of the Student Affairs & Services
TBD - College of Liberal Arts and Sciences
